Profile

Committed and passionate Software Engineering student with a strong interest in backend development with a strong foundation in building scalable, secure, and efficient server-side applications. I specialize in designing robust RESTful APIs, integrating relational and NoSQL databases, and implementing secure authentication mechanisms. I strive to deliver backend solutions that are maintainable, performant, and aligned with modern architectural standards.

Education

09/2022 – present Addid Ababa, Ethiopia	**Bsc.Software Engineering** *Addis Ababa University* ⬈ •Relevant Courseworks: Operating Systems, Web Development, Mobile Application Development, Networking Essentials, Artificial Intelligence, and Object Oriented Programming.

Skills

Web Development : HTML, CSS ,JavaScript, ReactJS and Spring Boot. ● ● ● ● ○

Programming Languages : Python and Dart ● ● ● ○ ○

Version Control : Proficient in Git and GitHub. ● ● ● ● ○

Mobile Development : Flutter ● ● ● ● ○

Problem Solving : Strong analytical and problem-solving skills, with experience in competitive programming like leetcode and codeforces. ● ● ● ● ○

Projects

Banking Management System ⬈
It supports features like user authentication, account management, fund transactions, and audit logging for administrative traceability.

Loan Management System ⬈
It allows customers to apply for loans, admins to approve/reject them, and automatically calculates EMIs and repayment schedules.

Movie Ticket Booking System ⬈
It allows users to browse movies, check showtimes, book tickets, and manage reservations effortlessly. Role: contributor

Personal Health Tracker ⬈
This system enables users to maintain basic health information, such as weight, exercise routines, and general well-being. Role: contributor

Certificates

Spring Boot ⧉
This certification demonstrates my understanding and practical skills in building robust, scalable, and production-ready web applications using the Spring Boot ecosystem.

Python Programming ⧉
I got hands-on experience in Python programming, developing efficient and scalable solutions for various projects.

Front End ⧉
Demonstrates my skills in creating responsive, user-friendly, and interactive web interfaces using modern front-end technologies.

Cisco Networking Academy ⧉
I gained practical experience in Cisco networking, including configuring and managing routers, switches, and VLANs to optimize network performance.
